ESPRING®, EXCLUSIVELY FROM AMWAY, IS
THE WORLD'S LARGEST-SELLING BRAND OF
KITCHEN WATER TREATMENT SYSTEMS*

eSpring®

100% REFRESHING
100% GUARANTEED

Nothing
Compares

HERE'S A TASTE OF JUST HOW GOOD PURE WATER CAN BE

Water is the single most important substance required for your body

Your blood is approximately 92% water and your muscles and brain 75%. Even our skin contains 70% water. So if your body is mostly water, it makes sense to ensure the water you consume is as pure as possible.

While others treat, eSpring purifies

The eSpring Water Purifier destroys more than 99.99% of harmful bacteria and viruses that may be in your tap water. Using ultraviolet light disinfection technology, it also removes more than 99.95% of cysts that may be present.

You'll taste the difference

eSpring traps more than 140 contaminants including lead and mercury, whilst retaining nearly 100% beneficial materials such as calcium and magnesium.

The special benefits of eSpring

- Destroys more than 99.99% of waterborne bacteria such as Cryptosporidium and Giardia in drinking water.
- Filter treats up to 5,000 litres of water, enough for the average family of six for a full year.
- The first in-home water treatment system to combine a carbon filter with ultraviolet disinfection and electronic monitoring.
- Meets highest standards of clean water quality – the first purification system in the world to have a carbon/UV system that meets NSF International Standards 42, 53 and 55.
- eSpring comes with an automatic two year warranty, and there's even an Extended Warranty available.
- Easy to install and comes with an electronic monitoring system that alerts you to change the filter.
- The first system to use wireless inductive technology to increase safety and reliability.
- Water Quality Association Gold Seal of Approval.

Destroys more than
99.99%
of harmful
bacteria

eSpring vs bottled water

Over 10 years, one eSpring® unit and replacement filters can filter up to 83,000 x 600ml of water.
